1835 66

October.

Dear Sir –

Awell wishes of yours. has just learnt & takes this opportunity of informing you – that previous to meeting of the society at their rooms. there was a considerable meeting of young men. at which they planned measures in regard to their proceedings on that day – a barrel of tar – a bag of feathers – a corrosive liquor & a quantity of an indelible ink was procured & in readiness. – The plan was, to take you & Mr Thompson to the common – strip you & feather you – & then dye your face & hands. black. in a manner that would never change from a negro colour – One of the young men told me that nothing but the energy & decision of the Mayor & his assistants saved you from your destined fate
